

Brazilian designer Silvia Furmanovich took cues from Japan when she opted for bamboo in her latest collection. Used for centuries in various types of craft, not only can it be manipulated into beguiling forms, but this self-regenerating, fast-growing plant is also sustainable. "In a single piece of bamboo you can find breathtaking beauty and an astounding simplicity," says Furmanovich, who has taken this humble material to new heights by combining it with gold and diamonds.

2 NOCHE EN BLANCO

Especialmente en verano, los eventos nocturnos no son terreno exclusivo del color negro. Los vestidos fluidos en tonos claros como el crema también tienen cabida si es en una silueta especial y con destellos.

ПАН БАРХАТ

Мода на все бархатное — платья, жакеты, ботфорты — официально разрешила носить материал «голубых кровей» не только в театральную ложу. От нас требуется лишь запомнить несколько правил: выбирать глубокие благородные оттенки — черный, изумруд, бордо и сапфир, избегать сложного кроя и излишнего объема и отказаться от кричащих надписей, логотипов и блестящих вышивок.
